THREAD-BY-THREAD SUMMARY

1.a [11:30] — Reminder about Clonaslee College 480 switching to Tyro

Original message: USLACKBOT: Reminder: Clonaslee College 480 will also switch to Tyro and please update the VSware tab to Tyro tab.

Project Code: **NO PROJECT CODE**

Thread summary: No replies.

1.b [13:32] — Discussion about consents in enrolment export

Original message: Lee: @channel Carolyn from Mount Temple called and wanted to see the consents in the enrolment export. I tested and it's not included in the export. Am I missing something?

Project Code: **NO PROJECT CODE**

Thread summary: The discussion started with Lee's question about consents in the enrolment export. Ravindra Chherke and Yashraj Talokar replied, and Yashraj explained that consents are downloaded individually in PDF format. U06UWDU2RU3 (Sharon) suggested adding a download all button for consents instead of changing the existing system. Yashraj agreed to add this to the list of enhancements. Later, Jayesh Jaiswal added consents to the current enrolment Excel export and deployed the change to live. The issue was resolved with the deployment of the updated export.

1.c [16:04] — Question about Notification SMS logic

Original message: Manish Pathe: Hi @Lee I have a question regarding Notification As you mentioned, the SMS notification logic should be the same as the Personal Notification flow. However, there is one important point to consider: Notifications currently support sending SMS messages without sending it to the mobile app. This functionality will be lost if we implement it exactly like Personal Notifications.

Project Code: **NO PROJECT CODE**

Thread summary: Manish Pathe asked about the SMS notification logic, and Lee suggested having a call to discuss. After the call, Manish decided to implement the old CMS functionality with an additional feature to send SMS messages to staff members. The issue was resolved with Manish's implementation decision.

1.d [18:58] — Question about booklist module

Original message: Ravindra Chherke: @Lee @Sunny Is booklist module still being used for something or can we stop upgrading/maintaining it.

Project Code: **NO PROJECT CODE**

Thread summary: Ravindra Chherke asked about the booklist module, and Sunny replied that it might not be used anymore due to the book scheme. Lee confirmed that they can stop upgrading/maintaining the module for now and will discuss it with James later. The issue is partially resolved, with a decision to stop maintenance, but the final decision on the module's fate is pending discussion with James.

Original message:

@Sunny Could you please confirm with JMM whether only the writeback should be disabled, or if all related processes—including writebacks, data pull/sync, rollovers, and mappings—should be turned off for the next two months (June and July)?

Original message:

@Kritika Wadhwa 0862345513 third year parent - Santa Sabina Dominican College

This parent has experienced three years that she cannot pay through the app. When she needs to authenticate her bank account, it shows her 0.00 EUR.

I asked her for screenshots or recording so she might share later.

[15:28] Sunny: @Kritika Wadhwa i've followed up with the school again

[11:30] USLACKBOT: Reminder: Clonaslee College 480 will also switch to Tyro and please update the VSware tab to Tyro tab.

■ [13:32] Lee: @channel Carolyn from Mount Temple called and wanted to see the consents in the enrolment export. I tested and it's not included in the export. Am I missing something? [Attachment(s): Screenshot 2026-05-27 at 15.04.24.png]

■ [14:29] Ravindra Chherke: @Yashraj Talokar

Do you want to add these consent in enrolment export?

■ [14:36] Lee: Yeah I think we should but maybe Sharon can confirm when she is back from her annual leave. Is there anyway you can get this for mount temple from backend for all enrolments?

Rather than make changes to the existing system maybe Yash can add a download all button for consents?

■ [14:43] Yashraj Talokar: Thanks Sharon, I'll add this to list of enhancements.

■ [14:46] Yashraj Talokar: It is easier to add this consents in current enrolment excel export than creating a download all button

■ [14:46] Yashraj Talokar: yes sure thank you

■ [15:12] Lee: thought we were adding for rebuild? If we can deploy on current live system even better but up to @U06UWDU2RU3

■ [15:25] Jayesh Jaiswal: @Lee consents have now been added to the enrolment Excel export and the change has been deployed to live.

[illegible]

■ [16:04] Manish Pathe: Hi @Lee

As you mentioned, the SMS notification logic should be the same as the Personal Notification flow. However, there is one important point to consider: Notifications currently support sending SMS messages without sending it to the mobile app. This functionality will be lost if we implement it exactly like Personal Notifications.

There are two possible approaches:

In this approach, teachers would need to select the years, classes, and primary/secondary user through filters to determine the SMS recipients along with SMS checkbox.

In this approach, there would be a single "Send SMS" checkbox. All recipient identification and data preparation would be handled by the backend, which would determine the users who should receive the SMS.

Which one should we implement?
